- Percentage – 56.16

PROJECTS

Kalkine — <https://kalkine.com/>

<https://kalkine.com.au/>

<https://kalkine.co.uk/>

<https://kalkine.ca/>

<https://kalkine.co.nz/>

This project has been started by me from scratch in Python and Django technology and I am playing the main role in this project as a Sr.

Developer, however there are 15 juniors with me on this project. This project basically sells the report research of various companies in 5 regions AU, UK, US, CA and NZ having websites on different domains.

Dispatcher — dispatcher.lflogistics.net

This is a very big project in Laravel and Sql Server and is being used in many countries for transport management where trailers carry the things from one warehouse to another warehouse. This project has the shipment, order, carton and pallet level stock tracking and management features. It has the Android and IOS app also for drivers.

McD — mcthairl.lflogistics.net

This project has been developed using Laravel and Sql Server and is used by McD staff in Thailand and other countries for managing the stock and

generating the reports. It manages the stock among different servers of McD by using Rest API.

McThai Accounting — mcthaioms.lflogistics.net

This project has been developed using Laravel and Sql Serve. It is for the internal accounting purpose of McD for Thailand. It has the feature of providing various reports which saves human accounting time. This project also has the feature of order management and order approval in various steps.

PHI Learning — www.phindia.com

This project is for E-commerce and offers books to be purchased online by online payment and Cash on Delivery. This project also has E-learning module where students can take online objective test.

Tax Heaven — <https://www.taxheaven.com/>

This project is for US client for property tax where tax clients can submit their tax issues to search a perfect tax pro and then tax pro try for making the tax reduce if possible.

Tax Hell — <https://www.taxhell.com/>

This project is also for property tax but it offers only few tax issues to tax clients for which they can submit request to search a perfect tax pro.

School Tube — www.schooltube.com

This project is for the students of school where they can find the videos related to their subject. From functionality point of view it is similar to YouTube.

Event Management System — www.bhasad.co.in

This project is for creating and managing events online.

Leave Management System — www.netsutra.com/leave

This project is for managing the employees details and their leaves online. Employees can apply leave online and their managers can approve/disapprove leave online, and HR can track all the leaves by logging into the system.

RoziHub — www.rozihub.com/

This project offers its users to book for the services like spa, nail spa, car hiring, labor hiring, plumber hiring online, in other words this project is most similar to just dial and urban clap.

FoodParadise — <https://www.foodparadise.net.in/>

This project is for a Restaurant (E-commerce) and user can order food online by placing order here, they can choose an online payment option or COD for payment.

Mediamatics — www.mediamatics.co.in/

This project is for a publication Industry which sells books online by online payment method and COD.

PropertyTaxbill — www.propertytaxbill.com

This project is for tax clients of US, with the help of this application tax clients can submit their query to tax pro regarding making the tax reduce.
